PROFESSIONAL SUMMARY

Flutter Developer with 7 months of professional experience at Classic Tech (March 2026 – Present), building and maintaining real-world Android and iOS applications. Experienced with Flutter and Dart, REST API integration, Firebase, local storage, and Flutter Secure Storage. Contributed to a real-world worker management application with production-focused features and API-driven workflows. Knowledge of BLoC and Clean Architecture, with additional hands-on training in MVVM, Riverpod, localization, Figma-to-Flutter UI implementation, Git/GitHub, and backend integration.

PROFESSIONAL EXPERIENCE

Flutter Developer — Classic Tech

March 2026 – Present | Kathmandu, Nepal

- Develop and maintain real-world Flutter applications for Android and iOS.
- Contribute to a worker management application, supporting production-oriented mobile features and workflows.
- Integrate REST APIs for authentication, data retrieval, submission, and application business workflows.
- Implement Firebase services for mobile application functionality and backend integration.
- Use local storage and Flutter Secure Storage for persistent and sensitive application data.
- Convert UI requirements into responsive Flutter interfaces and maintain reusable, clean components.
- Work with Git/GitHub and real development workflows, including debugging, testing, and preparing mobile application builds.

Flutter Training / Internship — MindRisers Institute of Technology

2025 | Kathmandu, Nepal

- Built Flutter applications using Clean Architecture, MVVM, and Riverpod state management.
- Implemented English/Nepali localization and responsive Figma-to-Flutter interfaces.
- Integrated RESTful APIs, Firebase Authentication, Firestore, Cloud Storage, and Hive offline storage.
- Collaborated using Git/GitHub and practiced clean code, reusable components, and performance optimization.

CORE TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Android, iOS, responsive UI, Figma → Flutter
State Management	BLoC, Riverpod
Architecture	Clean Architecture, MVVM, reusable components, clean code
API & Backend	REST API integration, Firebase Authentication, Firestore, Cloud Storage
Storage	Flutter Secure Storage, Hive, local data persistence & caching
Tools	Git, GitHub, Postman, Android Studio, VS Code
Languages	Dart, C++, Java, JavaScript, C#, Python (ML basics)

SELECTED PROJECTS

Totto – Local Buy & Sell Marketplace — Community marketplace with real-time chat, price negotiation, Phone OTP/Google Sign-In, and multilingual support. Tech: Flutter, Firebase, REST APIs, Riverpod, Django.

Classic Tech Worker Management App — Real-world production application experience focused on worker-management workflows, API integration, mobile UI, data handling, and secure local storage. Tech: Flutter, REST APIs, Firebase, Flutter Secure Storage.

Movie Recommendation System — Flutter application using TMDb API, TF-IDF, and Cosine Similarity for movie recommendations. Tech: Flutter, Firebase, Flask.

Weather / E-commerce / Chat Apps — Additional Flutter projects covering weather APIs, product browsing, authentication, Firebase/Firestore real-time messaging, and local data handling.

EDUCATION

Bachelor in Computer Application (BCA) — Saraswoti Multiple Campus, Lainchaur, Kathmandu
Completed: 2026

TRAINING & CERTIFICATION

Flutter Training – MindRisers Consortium (2025) — Dart, Flutter, Firebase, Riverpod, Hive, localization, teamwork and app scalability.

LANGUAGES

English (Fluent) | Nepali (Native) | Hindi (Proficient)
